

How to Install TVR Mobile

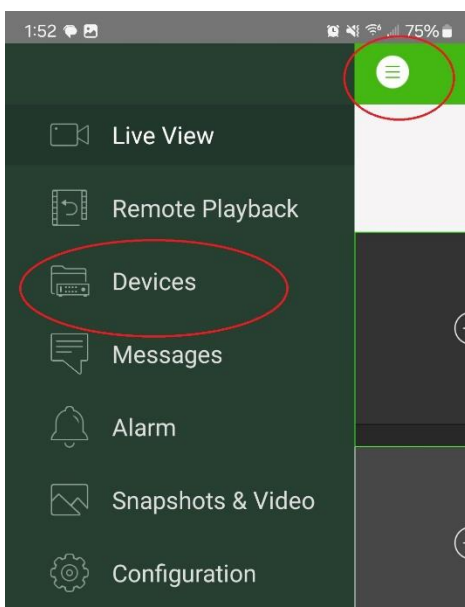

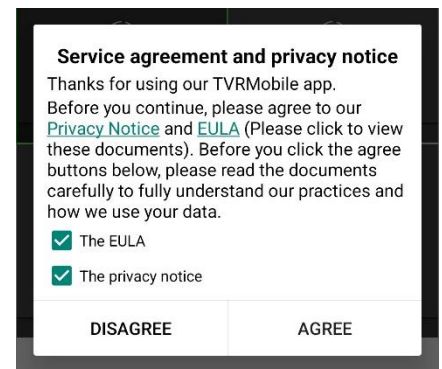

Works for both Android and iPhones (Android was used in the photos below). If you need further assistance, please contact Cottage Watchman at 574-594-2685.

1. Install Guard Viewer:

- Open your app store and search for **Guard Viewer**.
- Install the app by tapping Install (or Get for iPhone).
- iPhone: you may need your AppleID to install the app.
- Once installed, open the app.

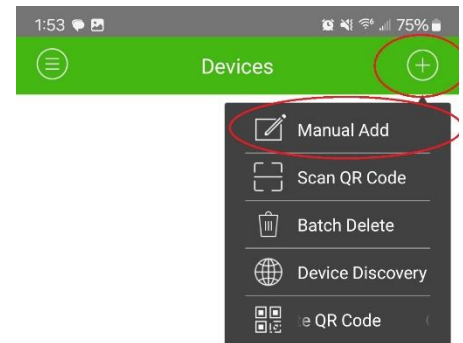

2. There will be several prompts for requesting you allow permissions to fully utilize the app (notifications, microphone, storage, etc.). For best results, it is recommended to agree to all permissions. You will also be requested to agree to the Service agreement. Check both boxes and tap AGREE to continue.

3. From the Default (Live View) page, tap the triple lines button (top left of screen) and select Devices from the menu. (See image to the left).

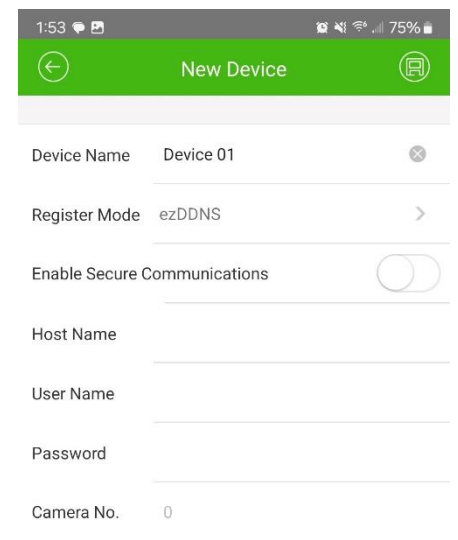

4. One on the Devices page, tap the + at the top right, and select Manual Add.

5. Fill out the New Device information as given to you from Cottage Watchman.

- a. Device name: _____
- b. Register mode: (ezDDNS)
- c. Enable Secure Communications: (Leave off)
- d. Host name: _____
- e. Username: _____
- f. Password: _____
- g. Camera No.: (Will automatically update once done.)

Once filled out, tap the save button (top right). The Camera No. at the bottom should update to the number of cameras you have. Tap START LIVE VIEW to view your cameras.

6. Troubleshooting – If you do step 5 and the cameras don't work, double check step 5 and try it again. If it still doesn't work, check to see if you are on wifi at the house/business where the recorder is. If so you can try the alternate setup for setting up a New Device. You will need additional information from Cottage Watchman:
- a. Device name: _____
 - b. Register mode: (IP/Domain)
 - c. Enable Secure Communications: (Leave off)
 - d. Address: _____
 - e. Port: (Leave default of 8000 unless instructed otherwise)
 - f. Username: _____
 - g. Password: _____
 - h. Camera No.: (Will automatically update once done.)

Once filled out, tap the save button (top right). The Camera No. at the bottom should update to the number of cameras you have. Tap START LIVE VIEW to view your cameras.
