

HOW TO VIEW LPR INFO – UNIVEW TECNOLOGY CAMERA

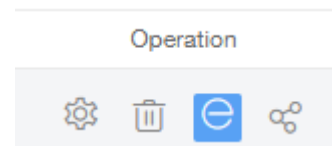

Updated: 4/9/25

To view LPR plates with a Univew camera, you must have a Star4Live account. If you have one skip to step 2.

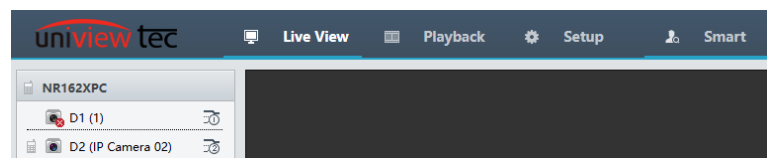

1. Create an account. Go to <https://global.star4live.com/login>.
 - a. Click on the “Sign Up” link and follow the instructions to create an account.
2. Contact Cottage Watchman with your name, and the email address used when you created your account.
 - a. Cottage Watchman will setup your account with the access you need to use the LPR camera.
3. Login to the LPR system:
 - a. Login to your account through the Star4Live website (see link above).
 - i. You may be prompted via a banner on the page to download a plugin. You should install that for proper operation of the system.
 - ii. Once the plugin is installed you can refresh the page, and the banner should go away.
 - b. Find the LPR system you want to connect to in the list. Under the Operation column (on the right) click on the lower-case “e” icon to open the system.
 - i. You may be prompted here as well to install a second plugin. This too is needed for proper operation of the system.
 - ii. Once the plugin is installed you should close the system tab, then click on the “e” to open it with the plugin enabled.

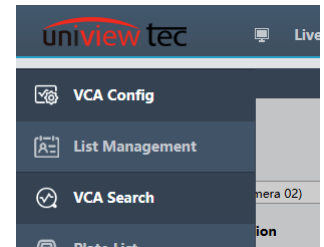

The login form has two tabs: 'Password' and 'Verification Code'. Under the 'Password' tab, there are input fields for 'Username/Email' and 'Password'. Below these fields are links for 'Log in Using Mobile Phone N...' and 'Forgot Password?'. A checkbox for 'I have read and agree to Service Agreement and Privacy Policy' is present. A blue 'Log In' button is at the bottom. A link for 'No Account? Sign Up' is at the very bottom.

4. Go into and run Analytics:
 - a. At the top, click on the Smart tab.
 - i. A Tip pop-up may notify you, “The Plate Detection switch....”. If it does, click OK.

- b. On the left, click VCA Search.
 - i. On the top, Select “Motor Vehicle Search”.
 - ii. Select Channel – Click Uncheck All, Check D2(IP Camera 02), Click outside of the drop-down menu to close it.
 - iii. Change the Start Time and End Time to whatever time you want to search (make sure to click ‘OK’ when exiting each time selection).
 - iv. NOTE: Vehicle Color is in test mode, and will not work. Plate No. does work, and can take partial plates, but plates mis-identified may not appear in the search so caution is advised (example, the reader may see ‘H’ instead of ‘M’).
 - v. Click ‘Search’.
